FEB **2024 - PRESENT**

- Key contributor to the development of Caymland, a cutting-edge digital marketing platform, using React, SCSS, MUI, Bootstrap, Redux Toolkit, and RTK Query.
- Led the redesign and reconstruction of Caymland, enhancing performance and modernizing the user interface.
- Collaborated with backend team and project manager for effective integration and project alignment.
- Automated digital marketing processes within Caymland, addressing complex challenges and delivering high-quality code.

Caymland (Caymland-Ultrasoft)

BRAINSTER - ACADEMY

1. Brainster Labs: Developed an academic platform with a user-friendly interface and educational functionalities, utilizing web development and design skills.
2. Street-Artist: Created a web space for street artists, focusing on responsive design and user engagement to enable artists to showcase their work.
3. Jadi Zdravo: Built an online platform for the gourmet community, featuring recipe sharing, community interaction, and an appealing website layout.
